

We Can Name Parts of a Plant

How to Use “Parts of a Plant” Mini Poster

Display the poster. Tell students that the poster shows several parts of a strawberry plant. Point out each labeled part and name it. Explain the main functions of the plant parts:

- A **fruit** gives seeds a covering.
- A **leaf** captures light to make food for the plant.
- A **stem** supports a plant and takes water from the roots to other parts of the plant.
- The **roots** take in water.

Refer to the poster periodically throughout your Tower Garden® growing process. Encourage students to use the correct plant part names as they describe their observations.
